Do you wish to:

- *become an embodied movement analyst and an expert in the field of the Laban Bartenieff Movement System?*
- *become a somatic teacher and therapist?*
- *incorporate an embodied movement vocabulary to integrate in your movement/dance technique?*
- *gain movement knowledge and language that supports scientific movement research?*
- *study, experience, research, discuss and delve into practice with all aspects of human movement*

EMOVE's certification program is an in-depth study of the theory and practice of human movement through the Laban/Bartenieff Movement System (LBMS). It is an approach to movement education and re-patterning that draws from a comprehensive theoretical framework and somatic practice.

EMOVE's certification program is taught in a combination lecture/laboratory format. Students will experience movement through theory and practice, focused observation, group discussion and hands-on practice. In this program we work from a moving body of knowledge to gain a rich embodied movement vocabulary, refine movement skills, clarify observation, and enhance expression and communication.
